

Community message from the Volusia County Health Department

The delayed delivery of the H1N1 swine flu vaccine nationwide means we have a limited supply of the vaccine and are using it to vaccinate priority groups first.

As the H1N1 swine flu vaccine becomes available in our community, the Volusia County Health Department is planning school vaccination clinics for students and teachers from the following groups:

- ❖ Private schools
- ❖ Public schools
- ❖ Child care centers
- ❖ Pre-K
- ❖ Head Start
- ❖ Charter schools
- ❖ Home-school

School vaccination clinics are being planned for the following areas:

- ❖ DeLand
- ❖ Deltona
- ❖ New Smyrna Beach
- ❖ Daytona Beach

Announcements will be made with detailed information regarding dates, times and specific locations of the upcoming school vaccination clinics. All clinics are subject to vaccine availability.

Our goal is to eventually vaccinate everyone in Volusia County who wants to be vaccinated for protection against the H1N1 swine flu virus. We expect regular vaccine shipments to begin flowing more frequently in upcoming weeks.

You are urged to practice the following flu prevention measures:

- ❖ Cover your cough
- ❖ Wash your hands
- ❖ Avoid school, work and crowds when sick
